Power Focus 6000 LV

Part of Power Focus 6000 family - Common tightening platform, making Smart Connected Assembly a reality.

Power Focus 6000 LV

Power Focus 6000 LV is designed to make everyday production easier and more efficient. Supporting low torque cable tools handheld and fixture types. Being the hub of a common tightening platform securing every type of joint! The Power Focus 6000 LV also increases your flexibility in re-balancing assembly lines by being the hub of the Virtual Stations that allows to connect up to 6 tools to the same controller. This flexible low voltage controller manages up to six virtual stations – each of them managing different levels of functionality being a scalable and customized solution with specific functions added individually or on a controller level.

Enjoy the same benefits of the Power Focus 6000 ecosystem providing a unique operator experience, with superior quality control and the most flexible integration.

IAM – Intelligent Application Module

Intelligent Application Module is like holding a key to Smart Connected Assembly. It unlocks all the benefits of software, tightening data and configurations. With IAM you have access to smart software management enabling you to benefit from easy and stable upgrades, with a rapid back-up function. Allowing a much safer upgrade process, always giving the possibility to switch between two software versions.

3300001564
100-120/200-240 VAC~

Tensor SL

Tensor SL transducerized screwdrivers are available in straight, right angle and pistol grip versions, with a straight model for fixtured applications that is very light and compact.

All the tools offer high power-to-weight ratios, good ergonomic designs and clear operator feedback via LED's lights.

Tensor SL: Safety-critical low torque tools for small screw applications.

It offers compact screwdriver ergonomics with traceability and error proofing capability.

Tool Control:

Making sure your tool is performing correct tightenings for your assembly.

- Program selection
- VIN handling
- Batch sequence control

Communication Control:

Communicating for easy and seamless integration with your production systems.

- Open Protocol
- Fieldbus
- Customer Protocols

Accessory Control:

Taking care of multiple accessories per virtual station.

- Stacklight
- Socket selector
- Digital I/O

Virtual Station

The Virtual Station is the center of the Power Focus 6000 tightening platform, it controls the tool, communication and accessories in your assembly station.

The Virtual Station is the enabler of your assembly. Gain total tool control with virtual stations making sure your tool is performing correct tightenings for your process.

You will gain increased flexibility with increased re-balancing speed in your production. Giving you a simpler installation with less cables, hardware components and network drops. On top of that it has lower power consumption, less floor space utilization and a much lower environmental footprint.
