

Atlas Copco Tool Calibration

Professional torque, angle
and force calibrations

Atlas Copco

Secure your quality and reduce defects in production

Professional torque, angle, and force calibrations increase quality and reduce rework and risk of liability costs. Performed by our calibration experts, all Atlas Copco calibrations fulfill global and national requirements.

What we provide

- Calibration process performed by certified technicians using traceable reference equipment
- Atlas Copco certificates following relevant standards, retrievable for at least 10 years
- Accredited lab and on-site calibration services, including adjustment where applicable
- Functional test before calibration
- Calibration due-date reminder
- Atlas Copco Tool Calibration is included in EasyStart and ToolCover

Values

- Traceability assurance of the production process
- Minimized rework, warranty, and recall costs
- Reduced risk of liability claims and reputation damages

Best if combined with

Right from the start

EasyStart

Improve the value and productivity of your tools and software. Our installation services guarantee quality right from the start. EasyStart includes calibration, operator training, and line audit.

Take care of your tools

ToolCover

Get maximum value and longevity from your tools with our preventive maintenance plans. Our modular product line is customizable to meet your unique needs. Calibration is included in ToolCover contracts.

Proactively optimize processes

ALTURE Optimize

A data-driven solution that proactively monitors your production quality. ALTURE Optimize provides real-time information and recommendations via mobile app push notifications, right in the palm of your hand.

We are the service partner for all Atlas Copco assembly technologies:

Tightening

Self-pierce riveting

Dispensing

Flow-drill fastening
